PCT/EP 03/14319

V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	27-38	YES
	Claims	1-26	NO
Inventive step (IS)	Claims		YES
	Claims	1-39	NO
Industrial applicability (IA)	Claims	1-39	YES
	Claims		NO

2. Citations and explanations

Reference is made to the following documents:

D1: EP-A-1 058 238 (SAMSUNG ELECTRONICS CO LTD),
6 December 2000 (2000-12-06)

D2: US 2002/096944 A1 (BOUTAGHOU ZINE-EDDINE et al.),
25 July 2002 (2002-07-25)

Document D3 is not cited in the International Search Report.
A copy is appended to the present report.

D3: US-2002/181140 A1 (SUBRAHRAMYAN PRADEEP K.),
5 December 2002 (2002-12-05)

1. Lack of novelty

1.1 The application fails to meet the requirement of PCT Article 33(1) because the subject matter of claim 1 is not novel (PCT Article 33(2)).

Document D2 discloses the following (the references in parentheses are to D2):

- a read/write head with a first block, and
- a support connected to the first block with a read/write element, the support being movably spring-mounted on the

- block by means of at least one leaf spring, and
- an electromagnetic actuator device with an electromagnetic element for generating magnetic forces which are transmitted to the support.

(See, for example, figures 2 and 8.)

- 1.2 Dependent claims 2 to 21 do not contain any features that meet the PCT requirements in respect of novelty and inventive step when combined with the features of any of the back-referenced claims (see documents D1 and D2 and the passages cited in the search report).

The features of claims 2 to 21 are just some of a number of obvious possibilities from which a person skilled in the art would choose according to the circumstances without making an inventive contribution in order to solve the problem of interest.

- 1.3 The application fails to meet the requirement of PCT Article 33(1) because the subject matter of claim 22 is not novel (PCT Article 33(2)).

Document D2 discloses the following (the references in parentheses are to D2):

- a method for controlling a read/write head as defined in point 1.1 above
- characterised in that the tracking of the read/write element is readjusted by at least one electromagnetic actuator device for the read/write head.

(See the whole document.)

- 1.4 Dependent claims 23 to 26 do not contain any features that meet the PCT requirements in respect of novelty and inventive step when combined with the features of any of the

back-referenced claims (see documents D1, D2 and D3 and the passages cited in the search report).

The features of claims 23 to 26 are just some of a number of obvious possibilities from which a person skilled in the art would choose according to the circumstances without making an inventive contribution in order to solve the problem of interest.

2. Lack of inventive step

- 2.1 The application fails to meet the requirement of PCT Article 33(1) because the claimed subject matter does not involve an inventive step (PCT Article 33(3)).

A person skilled in the art would regard it as a routine procedure to combine all the features specified in claim 27.

Dependent claims 28 to 38 do not contain any features that meet the PCT requirements in respect of novelty and inventive step when combined with the features of any of the back-referenced claims, because the features of claims 28 to 38 are just some of a number of obvious possibilities from which a person skilled in the art would choose according to the circumstances without making an inventive contribution in order to solve the problem of interest.
